FIRE DOOR  
DO NOT BLOCK

**Designed for the fabrication of glazed entrance doors for Shopfronts, Offices, other Commercial and Industrial Projects.**

**Suitable for Hinged, Pivot or Sliding configurations.**

**Sliding Options to suit Top Hung or Bottom Rolling manually operated Sliding Doors.**

**Automatic Operator Sliding Door applications are one of the more popular installations suited to the Commerce 45mm Commercial Door System.**

**Flush pocket glazing means no vertical glazing beads with horizontal beads on one side only, resulting in improved appearance, security and lower manufacturing costs.**

**Suitable for a range of glass thicknesses from 5mm up to 12.38mm in single glazed and 22mm to 30mm Insulated Glass Units in Double Glazed.**

**The joinery uses a revolutionary clamping system that is direct, eliminating any possibility for the joint to fail.**

**This Technology allows for rails and midrails to be easily positioned.**

**No processing of the stiles not only saves time for manufacture but also maintains the structural integrity of the corner joints.**

**The use of two stainless steel bolts eliminates twist in the door rails for a superior connection.**

**The Commerce 45mm Commercial Door is designed to suit hardware manufacturer by leading hardware suppliers.**
